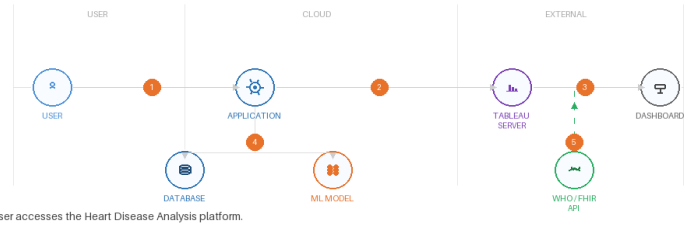
## Data Flow Diagrams:

A Data Flow Diagram (DFD) is used to visualize the flow of information in a system. For this project, the DFD will illustrate how heart disease data flows through the system, including how data is captured (patient demographics, medical history, lifestyle choices, etc.), processed (analysis in Tableau), and presented (interactive dashboards for decision-makers).

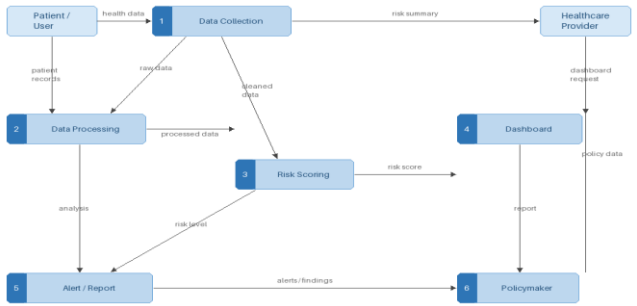
**Example: (Simplified)**

Flow



1. User accesses the Heart Disease Analysis platform.
2. Application processes and loads patient data for analysis.
3. Enriched risk data visualised in Tableau Server dashboard.
4. Data stored in Database; ML Model classifies risk: Low / Medium / High.
5. WHO & FHIR APIs feed live health benchmarks into Tableau Server.

Example: DFD Level 0 (Industry Standard)



## User Stories

| User Type | Functional Requirement (Epic) | User Story Number | User Story / Task | Acceptance criteria | Priority | Release |
|---|---|---|---|---|---|---|
| Customer (Mobile user) | Registration | USN-1 | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard | High | Sprint-1 |
| | | USN-2 | As a user, I will receive confirmation email once I have registered for the application. | I can receive confirmation email & click confirm | High | Sprint-1 |
| | Login | USN-3 | As a user, I can log into the application by entering email & password. | I can log in and access the dashboard. | High | Sprint-1 |
| | Dashboard | USN-4 | As a user, I can view my personalized dashboard for heart disease risk analysis. | I can view visualizations of my health data (e.g., cholesterol, BMI). | High | Sprint-1 |
| | | USN-5 | As a user, I can track my health data and receive suggestions to lower heart disease risk. | I can access insights like increasing activity or changing diet. | Medium | Sprint-2 |
| Customer (Web user) | Dashboard Access | USN-6 | As a user, I can access my heart disease risk dashboard on a web interface. | I can interact with the dashboard, comparing my risk factors. | High | Sprint-1 |
| Customer Care Executive | Assist Users | USN-7 | As a customer care executive, I can assist users with their dashboard issues and questions. | I can provide users with guidance on understanding their health data. | Medium | Sprint-2 |
| Administrator | Manage Data | USN-8 | As an administrator, I can update and manage heart disease data in the system. | I can add, update, or delete patient health records. | High | Sprint-2 |

| User Type | Functional Requirement (Epic) | User Story Number | User Story / Task | Acceptance criteria | Priority | Release |
|---|---|---|---|---|---|---|
| | Access Reports | USN-9 | As an administrator, I can view comprehensive reports on heart disease trends across populations. | I can access summary reports and detailed visual analytics. | High | Sprint-2 |
