Project Title: Heart Disease Analysis **Project Design Phase-I - Solution Fit Template** **Date :- 23 February 2026**

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) CS

Who is your customer?

- Healthcare Providers (Cardiologists, General Physicians)
- Government Health Officials & Policy Makers
- Adults aged 30+ with lifestyle risk factors
- Hospital & Clinical Health Systems
- Public health researchers & analysts
- Students learning health analytics

6. CUSTOMER CONSTRAINTS CC

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

- Limited technical knowledge for data interpretation
- Budget limitations in hospitals & government organizations
- Internet access issues in rural areas
- Data privacy concerns
- Lack of centralized, unified health records

5. AVAILABLE SOLUTIONS AS

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

- Manual Excel-based health record analysis
- Traditional statistical reports
- Basic hospital record systems
- Consultation-based risk assessment

Limitations:

- No interactive visualization
- Time-consuming manual interpretation
- Hidden patterns not clearly visible

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS J&P

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

- Identify risk factors contributing to heart disease
- Detect high-risk patients quickly
- Understand demographic and lifestyle impact
- Analyze medical conditions (diabetes, stroke, kidney disease)
- Interpret complex medical data with ease
- Support preventive healthcare decisions

9. PROBLEM ROOT CAUSE RC

What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations.

- Sedentary lifestyle & poor dietary habits
- Lack of awareness about preventive healthcare
- Delayed diagnosis due to non-interactive reports
- Disconnected medical data systems
- Dependence on outdated, manual analysis

7. BEHAVIOUR BE

What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

- When medical reports show abnormal results
- After hearing about increasing community heart disease cases
- When doctors advise lifestyle changes
- When family history triggers concern
- When digital health awareness rises

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS

TR

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

- Seeing rising heart disease cases
- Exposure to alarming survey statistics
- Family member suffering a cardiac event
- Doctor recommendations
- News and public awareness campaigns

4. EMOTIONS: BEFORE / AFTER

EM

How do customers feel when they face a problem or a job and afterwards?

Before:
- Confused, unsure about heart disease risk factors
- Worried about symptoms & medical reports
- Overwhelmed by complex data
- Fearful of long-term health issues

After:
- Clear understanding of risk patterns
- Confident in personal health decisions
- Motivated to adopt preventive habits
- Relieved by simple, visual interpretation

10. YOUR SOLUTION

SL

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.

A **Tableau-based interactive Heart Disease Dashboard System** that:

- Visualizes demographic, lifestyle & medical risk factors
- Highlights top predictors using heatmaps & story points
- Converts raw health data into easy-to-understand visuals
- Supports doctors, policymakers & individuals
- Encourages early diagnosis & prevention

Why it fits:
- Works for both technical & non-technical users
- Matches customer behavior (prefers visuals over reports)
- Removes confusion around risk factors
- Faster and more intuitive than traditional reports

8. CHANNELS of BEHAVIOUR

CH

8.1 ONLINE

What kind of actions do customers take online? Extract online channels from #7

8.2 OFFLINE

What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

ONLINE:
- Hospital portals & dashboards
- Online consultations
- Government health portals
- Email reports
- YouTube/health blogs
- Tableau dashboards

OFFLINE:
- Hospitals & clinics
- Medical camps
- Doctor consultations
- Fitness centers
- Community awareness events

Identify strong TR & EM
