Project Design Phase-I
Solution Architecture

Date	24 February 2026
Team Members	Aadya Shukla, Aarav Chaturvedi, Aastha Sudan
Project Name	Heart Disease Analysis
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a structured process that bridges the gap between the healthcare challenge of heart disease risk identification and the technological solution using data visualization tools. Its goals are to:

- Transform raw medical data into meaningful insights
- Provide interactive dashboards for analysis and decision-making
- Define system components, data flow, and user access
- Ensure scalability, security, and efficient data processing

Example - Solution Architecture Diagram:
